## Multiannual Financial Framework (MFF) post-2020

---

### Resolution of the Presidium

In view of public consultations on the structure and scope of the EU's Multiannual Financial Framework post-2020, the Presidium of the European Confederation of Independent Trade Unions (CESI) notes the following priorities:

1. Make the values and principles in the Treaties –democracy, fundamental rights, equality between women and men, anti-discrimination, social rights and justice– the framework of reference for the next MFF;
2. Make fundamental rights and workers' rights visible in budget headings in the post-2020 MFF policy priorities and support strong financial instruments and programmes;
3. Provide adequate and predictable funding, including through operating grants, for all trade union organisations and civil society organisations;

Make EU funding more accessible to trade unions and civil society organisations, including operating grants, at national and European levels, in neighbouring and developing countries. This includes the balanced funding for all trade unions, including independent trade union organisations.
